1. The Uzhgorod sawmill sometimes supplies wood to the Velikiy Lazy Alcohol Factory. The main structure at the sawmill consists of a large roof supported by stone pillars. The structure has no walls. The machinery is located under this roof and consists of a large saw and three or four electric motors.
2. The area surrounding the sawmill is enclosed by a metal fence. A gate opens into the road and there is a guard box by the gate. Within the fence, wood and lumber are piled in several places. (For a sketch of the sawmill area see page 2.)
